23. Assumes responsibility for defining NP role for patients, physicians, nurses and other health team members.	XX					
24. Formulates and functions within an appropriate scope of practice.	XX					
25. Appropriately utilizes preceptor consultation.	XX					
26. Integrates research findings into plan of care and shares findings with other health team members.	XX					
27. Practices self evaluation in order to identify areas for improvement.	XX					
28. Wisely selects and seeks learning experiences in an effort to increase skills and improve areas of weakness.		XX				
OVERALL: I would rate this student's performance:						

COMMENTS: Kim was a pleasure to precept. The staff found her to be approachable and empathetic and she was well liked by the other providers in the group. The ED was a big step outside of her practice area of expertise and she matured nicely into a clinician. She was helpful, intuitive and has a wonderful personality and clinical decision making ability. She will do very well as a graduate ACNP and will do more than her part to make the program proud.
